Volunteer

River Otters of South Florida Alliance: ROSFA

Who Should Volunteer

Currently, only individuals residing in the cities of Ft. Meyers, San Carlos Park, Estero, Bonita Springs, and Naples should apply to be a volunteer. Volunteers who are permanent residents shall be considered first. However, seasonal residents should initially consider volunteering as “Otter Spotters” or other volunteer activities that are short-term or available during winter season.

This restriction is in place as the volunteer program is just beginning and volunteers will, initially, be assisting a scientist studying river otters in southwest Florida. This restriction should ensure the necessary continuity in volunteer resources for the current river otter research activity.

Please don't be disappointed. As time, resources, and opportunities for program activities become available additional volunteer opportunities will become available.
